

Abu Dhabi's Khalifa Port's expansion is on pace for completion, with the South Quay set to begin operations in Q1 2021

The [Khalifa Port expansion](#), announced in December 2019, aims to attract new business and significantly boost capacity in line with evolving customer expectations, and has progressed significantly since its inception despite the challenging economic conditions presented by the global pandemic.

Upon completion, the project is expected to substantially increase handling volumes by providing additional deep-water access and enhanced infrastructure.

To date, 200 metres of quay wall and almost 175,000sqm of land within [Khalifa Port Logistics \(KPL\)](#) have been handed over ahead of the project's full phase one completion in Q1 2021.

Progress has also been made on Abu Dhabi Terminals' (ADT) expansion plans with the delivery of five new ship-to-shore cranes. With each unit boasting a lifting capacity of 90 tonnes, the new cranes have boosted capacity at the terminal significantly and have put Khalifa Port Container Terminal on track to meet its target of 5 million TEUs by the end of 2020.
